temperance. The reformers meant well, but there wasn't anything to reform. The mammon of unrighteonsness will now be wholly given over to hospitality.

Several classes of criticism evoked by the Irish Land bill are enamerated in our special cable dispatches. Most of them appear to be captious and superficial. The law journals point out a more serious flaw. The bill will tend to promote litigation, so that in the end the lawyers will get land, tenant right and improvements. This is not the new class of peasant proprietors which the Land League but the possession of a whole house can give. and the Liberal Reformers are so anxious to

create. The last hours of the Nihilist assassins were devoted mainly to literary recreations. One devised his inventions to the Government; another scribbled away his remaining wits in writing out passages of his speech which he had not been allowed to deliver: and the woman dispatched a letter to her mother, cautioning her not to waste time in attempting to appease the father. One showed the whitefeather, begging for his life and offering his services as a spy. There is nothing here to remind us of the last night of Vergniaud and the Girondists.

Mr. John G. Thompson has found his breath again, and it is a whole northeaster in itself. at 5. Next to Government bonds, improved He thinks the prospects of the Democrats in Ohio are excellent. It is not to be wondered "We have the grandest party in the world!" he exclaims. Why is it the grandest? | description is doing as well as he ought to ex-"Because defeat after defeat makes no differ- pect if he gets a return of 5 or 6 per cent net ence, and we march right up to the front and above taxes, insurance and repairs. make a determined fight every time." Mr. nson is one of the few men in the party

new defeat he takes more philosophically than the last. It has been hard to understand why, but it is plain now. It is because it enables the moral grandeur of the party to loom up, and he, having a natural taste for political sublimity, is awed and edified.

There is a weird story in the local columns. One of Hiram Powers's pupils is found dead in a house where he has been living like a hermit. The room is in extreme disorder, newspapers and egg-shells littering the table and floor, and heaps of ashes encircling the stove. In the centre of the room is a bust of Goethe with modelling tools at its base, and among the rubbish in a corner are the stereotype plates about it. of satirical verses. The eccentric man has evidently been giving his last thoughts to Goethe, for a linen cloth has been thrown over the bust to protect the damp clay. Resting a moment before resuming his work, he has fallen back in a stupor and death has crept in, and Turkish Government, and which were seconded in the darkness and silence has stealthily by the Powers with such positiveness as to closed his eyes.

Lord Salisbury's reputation for straightforward diplomacy has not been free from taint since he made the secret compact with Count Schouvaloff. The Tunisian disclosures, our special cable dispatches state, have compromised him still further, as they seem to convict him of actual dishonesty. The confidences with M. Waddington were exchanged at a time when the British Foreign Secretary was intriguing right and left in the dark, making back-stair bargains with Eussian and Turk, and his memory may have friend and foe. One treaty, which Marvin, the tell-tale clerk, regarded as too much of a secret to be betrayed, has never been brought to light. It was made about the time the Schouvaloff Memorandum and the Angla-Turkish Convention were signed.

The article by Colonel George E. Waring, ir., on "The Sewers of New-York," from which, by and Throng's Neck to Coney Island, poi ception." If the rich are not lodged where it The Greeks do well to make the is safe for human beings to live, what is to be said of the homes of the poor!

erred or sex.

Queen Victoria's drawing-room is a dismally ceremonious thing; but the last time it was held there was a pretty bit of youthful brightness visible. Between the folding-doors at the end of the gallery peoped and peered Alexandra's three small daugh ters, their spackling faces and dancing eyes little according with the deep court mourning they were.

The late Lady Blanche Murphy, The London World says, did not clope with her husband. The family remonstrated, but the lady was determined, and the Earl yielded so far as to be present at his daughter's marriage. Lady Blanche was never given up by the family. She always remained on the most filial and sisterly terms with them, but to the last refused pe-cumary help, except on one occasion.

Colonel Higginson, in his lecture on the "Aristocracy of the Dollar," given in Boston the other evening, said that one of the crowning merits of this aristocracy is that it represents to-day instead of yesterday; it is always forward, and its successes wherever positive injury is sustained by one it. When the week before she worshipped and virtues are to-day's. This aristocracy takes fewer airs upon itself and is less consciously insolent than that of birth. It has the merit of knowing

The late Bertha Buxton, the novelist, was German by birth but reared in England. In order to qualify herself for her clever and successful novels of stace life she obtained an engagement with a friend, the manager of a theatre in the provinces, and for a little time appeared upon the stage. It is said that it was at Eacter that she first made the acquaintance of the marvellous versatile actress described in "Jenny of the Prince's," who could play Ophelia one night and was perfectly ready to appear as the wayward Topsy in "Uncle Tom's Cabin" on the next,

Mr. Carlyle once wrote concerning contemporary literature to Mr. Basil Montagu: "I love it not, Lower down than the Restoration I rarely venture in English. These men-these Hookers, Bacons, Browns-were men; but for our present 'men of letters'-our dandy-wits, our utilitarian philosophers, our novel, play, somet and song manufacturers—I shall only say: 'May the Lord pity us and them!'" He seems, however, to have recognized some excentions, for, in a subsequent letter he writes: " Assure Air. Montage that his book was the most delightful I have rend for many days. Your hand also was visible in it. Why does he not publish more such?" So, in writing, about the same time, to Mr. Proctor (Barry Cornwall), soliciting his aid in procuring testimonials for his use as candidate for the chair of Moral Philosophy in the University of St. Andrews, he asks: 'What is become of your seven-stringed shell that once gave such notes of melody?" Mr. Montagn that his book was the most delightful

OTTAWA, Ont., April 16 .- It is understood that the Princess Louise will visit Saratoga Springs during the coming summer.

HAVANA, April 16,-Henry C. Hall, United States Consul-General here, sailed hence for New-York on the steamer Saratoga to-day.

### GENERAL NOTES.

A singular accident recently occurred at the Inverness, or East Coast Sea Lock of the Caledonian Canal, which resulted in the temporary closing of through canal navigation, and in the wreek of two schooners. The Progress, of Castleton, Isle of Man. with potatoes for Cardiff, and the Regent, of Inverness with coal, entered the Sea Lock at flood tide, and started to go through the canal together, both racing in the lock at the same time. The lock, however, proved to be too narrow; the vessels got wedged together between the narrow; the vesses got weeved together observed and left piers, and while in this position the tide ebbed, and left the schooners hanging in mid-nir. They were greatly strained and the sides were broken. When the life flowed they were covered with water, and it was feared that they must become total wreeks and be broken up be fore not ignation could be resumed.

After three months work one of the most periant operations of the kind on record has resulted floating the irone and Richellen which took fire on beas at first lightened by the removal of the iron placing the turnets, all openings were then closed, the water as jumped out and air was pumped in by means of im-nactables. The refloating proper began a fortnight a. Two pumps were placed on the SPrylle and a tres an hour. Tackle was fastened to the musts and is of the Richellen and connected with the An

BITS OF CRITICISM.

CONDS AND CHARACTER .- At best genius is is the bear of the third upon carrie; we as the implies in fit be dearest that inducence as consecrating bin or the sets as well. Connecte of spiritual numbered is of created but early communicated. It is not our nearestant many brought about with our own realess cristly or solerious concurrence in some sorters is hone-try wrought out of the most strend conformity to the principles of numbered finite. It pursue with no histonian piety, transition and the person for the cheap mainty of the prayer look account in the particular that is the particular of the conformation of the conformation which means, the modern and the best looked and the particular to the conflows illustrate which means, the modern and the best looked as that while the gradus cuts such a lustrous first in a first while the gradus cuts such a lustrous first in a second.

ROBERT BUCHANAN AND "His CHILD OF NATION"—It accurred to us several times in residing this interesting romaine that possibly in movel virting Mr. Buchanan and discovered the one sort of literary work for which his talents were thoroughly and not movely partially fitted. But this is not our final equation as we close the valuraes. We find in them, as we have found before in Mr. Buchanan's dramas, posms, resard and criticisms, a considerable amount of cleverness, quickiness of perception, sense of natural and continual beauty, all shooked and rendered fractiless by that inherent want of distinction, in both senses of the word, which is perhaps the most fatal want that allterary artist can have. Mr. Buchanan is a channelson for versatility; he can adopt, at a moment's warning, the color and style of any author or school of authors—for instance, he can be determined the Mr. William Block—but he never has also dayed, everyt sometimes in his wrath, a manner which can be recomined as individual to himself. Acaim, he is often instructed, apparently in all sincerity, by larce and generous aims, miscifish enthosians, and warm impoleses; but he can never quite throw of a twant of what we must be permitted to call vulgarity—[The Saturday Review. ROBERT BUCHANAN AND "HIS COULD OF

MISS BRADDON'S TURNIP .- Miss Braddon's is incomparably the best padding to be met with in med-ern novel-writing. She has to perfection the art of cook-ing her turnip to make it taste like preserved ginger.— (London News.

(London News.)

GIBBON'S ENVIABLE DISPOSITION.—No one capable of being a partisan could have preserved that stately march and equable development of the vast drama of human affairs which gives a menumental dignity to his great book. Even if yer do not want to write another beeline and Fall, is not such a disposition the most enviable of gifts i If such a life has less vivid passages, is there not something fascinating about that culm, harmonious existence, disturbed by no spassnolle storms, and yet devoted to one achievement grand enough to extort admiration even from the least sympathetic! Surely it is a happy mean: enough genias to be in the front rank, if not in the highest class, and yet that kind of genius which has no affinity to madness or disease, and virtue enough to keep up to the respectable level which justifies a comfortable self-compineeney without suggesting any swkward deviations in the direction of martyrdom. That is surely the kind of composition which a man might device like it is best chance of extracting the greatest possible amount of enjoyment out of life. Luckily for the world, if not for its heroes, men's characters cannot be fixed by such calculations; and a certain number of perverse people are even gind to possess vehement emotions and restiess intellects, however conscious that the flery soul will west out the pygmy body.—[The Cornhull.
